

Autonomy you can account for. Govern every agent. Prove every control.

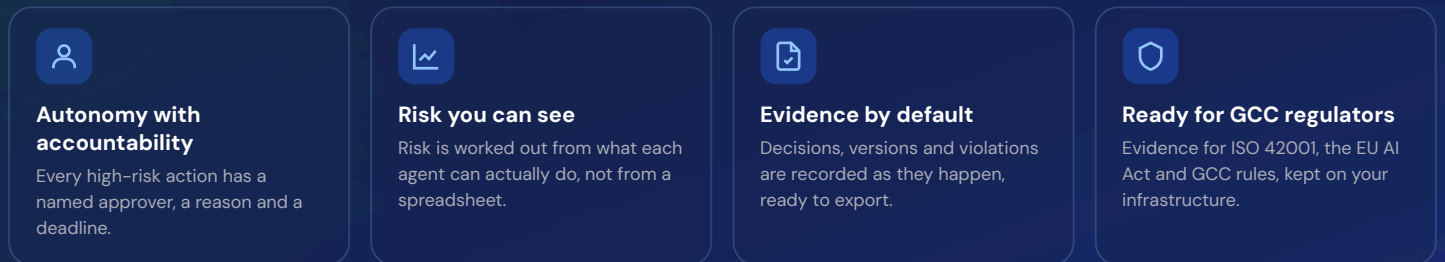

AI agents now approve refunds, send email and change records on their own. Regulators, auditors and boards are asking the same questions: which agents can do damage, who signs off before they act, and where is the evidence? **Evolvable.ai answers all three from one place:** it assesses the risk of every agent and workflow, puts a person in front of every high-risk action, and maps the evidence to the frameworks you report against.

FIVE WAYS TO KEEP A PERSON IN THE LOOP

WHAT YOU GET

BUILT FOR

CISO & security operations

Stop risky agent actions before they happen.

Risk & compliance

A live register of AI risk instead of a spreadsheet.

Internal audit

Traces and approvals you can sample and verify.

CIO & Chief AI Officer

Scale agents without losing visibility or budget control.

5

oversight modes on any tool, MCP call or workflow step

4

SLA actions: remind, escalate, auto-decide or AI judge

Any date

see the fleet exactly as it was, and restore

1

register for every agent and workflow you run

Assess. Oversee. Observe. *Prove.*

Agent & workflow risk register

AGENT / WORKFLOW	CAN DO	OVERSIGHT	RISK
Finance Assistant	Moves money	Gated	High
SOC Triage Agent	Runs commands	Partial	High
Vendor Risk Review	Sends email	Gated	Medium

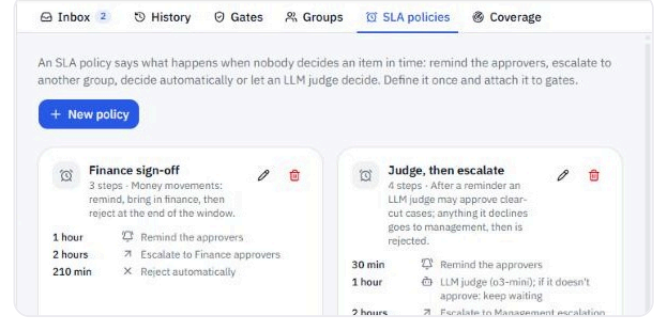

2 write tools run with no one deciding [Add a gate →](#)

01 ASSESS

Which agents can do damage?

OUTCOME *A live AI risk register, not a spreadsheet.*

- **Risk profile** for every agent and workflow, from the tools it can call, the data it reaches and how freely it acts.
- **Oversight coverage:** gated, partial or autonomous, with every write tool that runs freely flagged.
- **Register & reviews:** owner, risk tier and review date. Export for audit.

02 OVERSEE

Who signs off before an agent acts?

OUTCOME *Every high-risk action has an approver and a deadline.*

- **Five gate modes** on any tool, MCP call or workflow step, from pre-approval to AI judge.
- **Approve anywhere:** web app, Slack, Teams, WhatsApp or email, with approver groups incl. external.
- **SLA policies** remind, escalate or auto-decide. Every decision logged with its reason.

Conversation trace

Finance Assistant · v14

Prompt	"Refund the duplicate charge on #4471"
Retrieval	Refund policy v3 · 2 chunks
Tool call	get_transactions(#4471)
Approval	refund_payment · approved in 11 min
Response	Refund issued, customer notified

12.4k tokens · \$0.04 · 18 s · 0 guardrail hits

03 OBSERVE

Why did the agent do that?

OUTCOME *Every outcome explained, every agent tested.*

- **End-to-end traces:** each prompt, retrieval, tool call, hand-off and approval, with the agent version that ran it.
- **Performance & quality:** response time, error rate, guardrail hits and eval pass rate per agent and model.
- **Evals before go-live:** scripted test suites with pass criteria; write tools are mocked during tests.

Fleet as of

30 Sep 2026

AGENT	VERSION	LAST CHANGE	
Finance Assistant	v12	tools, guardrail policies	Restore
SOC Triage Agent	v7	instructions	Diff
Vendor Risk Review	v3	approval gate added	Diff

[Export evidence](#) · register, violations, approvals, traces

04 PROVE

What was live on the day of the incident?

OUTCOME *Audit evidence the platform produces, not people.*

- **Change control:** every change versioned. See the fleet as of any date, diff it and restore.
- **Evidence on demand:** export the register, violations, approval decisions and traces.
- **Compliance mapping** to ISO 42001, the EU AI Act and GCC frameworks, with a readiness score. **COMING SOON**

Visuals are illustrative, except Oversee (product screenshot)

SOVEREIGN BY DESIGN

- **Runs on your cloud,** private cloud, on-premises or air-gapped. Registers, decisions and evidence stay in your estate.
- **Flat annual licence,** unlimited users. Evolvable.ai won't certify you; it produces the records auditors ask for.

EVIDENCE FOR THE FRAMEWORKS YOU REPORT AGAINST

- ISO/IEC 42001
- NIST AI RMF
- EU AI Act
- UAE PDPL
- DIFC Reg 10
- KSA PDPL & SDAIA
- Internal audit (IIA)

*See your governance posture.
In 45 minutes.*

We connect one live agent, assess its risk, put a gate on its riskiest tool and walk you through the evidence trail.
