

One AI platform for your back office. Built for manpower providers.

Evolvable.ai is an enterprise AI agent platform. You build agents and workflows on it, connect them to the systems you already run, and govern all of them in one place. Manpower providers use it for the document-heavy work behind every placement: worker documents, client KYC, suppliers and procurement. One platform, one licence, on your infrastructure.

EXAMPLE A worker-document agent built on Evolvable, with an approval gate before anything is submitted

WHAT MANPOWER PROVIDERS BUILD ON EVOLVABLE

Start with one use case. Add the rest on the same platform.

Workforce compliance	Due diligence	Suppliers & procurement	Operations & finance
Visa & document processing Read passports, permits, IDs and medicals; cross-check every field	Client KYC / KYB Trade licence, owners, signatories and watchlist checks	Supplier onboarding Licences, insurance and bank details verified	Timesheet to invoice Match timesheets, rates and client invoices
Expiry & renewal tracking Visas, IDs, medicals, labour cards: renew before they lapse	Worker screening Identity, history and document authenticity checks	Supplier performance Score sub-agencies, transport and camp vendors	Worker helpdesk Payslips, leave and accommodation questions, 24/7
Worker onboarding Collect documents and answer questions on WhatsApp	Contract review Client and supplier contracts against your standard terms	RFQ to PO Draft RFQs, compare quotes, raise POs for approval	Inbox triage Classify and route client and authority emails

BUILT FOR	PRO & visa teams	HR operations	Compliance	Procurement & finance
	Fewer resubmissions, no missed expiries	Onboard faster, answer workers 24/7	KYC files and audit trail on demand	RFQ to PO and invoices, approved and logged

1

platform for agents, workflows, knowledge and controls

100⁺

integrations, plus any system through MCP or API

Any

LLM, chosen per agent, cloud or on-premises

Flat

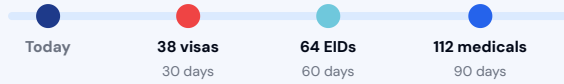

annual licence with unlimited users

Four use cases. *One platform.*

01 Visa & document processing

From WhatsApp photo to verified file.

EXPIRY WATCH · NEXT 90 DAYS

renewal tasks raised and workers reminded automatically

- Reads passports, entry permits, Emirates IDs, medicals and labour contracts from photos, scans or email
- Cross-checks names, numbers, dates and sponsor details across every document
- Flags problems before submission and tracks expiries 90 days ahead

≈ 9 min per worker file, vs 45 min by hand

02 KYC & due diligence

Know every client before you deploy a worker.

✓ Trade licence
valid to 2027

✓ Owners & signatories
2 of 2 identified

! Watchlist screening
1 possible match

✓ Credit & payment terms
within policy

- Extracts trade licence, owners and signatories from the documents clients send
- Screens names against the watchlists you subscribe to; possible matches go to compliance
- Builds a KYC file with sources, ready for audit

Same day client onboarding, vs 3–5 days

03 Supplier management

Sub-agencies and vendors, always compliant.

Sub-agency A Licence OK		92
Transport vendor B Insurance expires in 21 days		78
Camp operator C Audit due Nov		85

supplier score: compliance · delivery · cost

- Verifies licences, insurance, bank letters and certificates on onboarding
- Watches expiries and chases suppliers for renewals automatically
- Scores suppliers on compliance, delivery and cost each month

0 expired supplier documents missed

04 Procurement automation

RFQ to PO in an afternoon.

 RFQ drafted from template	QUOTE COMPARISON		
	Supplier 1	AED 41.2k	10 d
	Supplier 2	AED 38.9k	14 d ★
	Supplier 3	AED 44.0k	7 d

recommendation + PO draft → approval gate

- Drafts RFQs from your templates for uniforms, PPE, transport and accommodation
- Reads supplier quotes in any format and builds a side-by-side comparison
- Recommends a supplier and drafts the PO; a manager approves before it is sent

2 days → 2 hrs from request to approved PO

ILLUSTRATIVE · 300 NEW WORKERS A WEEK

What it adds up to

≈ 780

hours of document work returned each month

≈ 5

FTEs moved from data entry to exceptions

90 days

early warning on every expiring document

Figures are directional examples for a staffing operation of this size, not a guarantee. We baseline your real numbers in the pilot.

A person signs off

Approval gates on submissions, payments and supplier selection. Every decision logged.

Worker data stays with you

Passport and ID data on your infrastructure, masked before any external model.

Where workers are

WhatsApp, email and Teams, in Arabic, English, Hindi, Urdu and more.

Fits your systems

Connects to your HRMS, ATS, ERP and shared drives. No rip-and-replace.

*Start with one use case.
Run it on your own documents.*

A 4-week pilot on the platform, on your infrastructure, with your team in the loop. Most manpower providers start with worker document verification, then add KYC, suppliers and procurement on the same licence.
